

Oak Wilt Trenching Effort Update

Our application for cost sharing from the State of Texas was approved last week (Oct 13). This cost sharing will save the neighborhood 40% of the oak wilt trenching costs. The HSR HOA is currently working with our contractor, Oak Wilt Specialists (OWS), to schedule the trenching work. We hope to begin trenching soon.

You may have already been visited by one of the HOA board members, who are currently going door to door with information about the trenching effort and soliciting contributions. Thank you to all that have contributed to offset the cost of trenching! If you would like more information about the oak wilt situation, or to contribute to the trenching effort, please call Chip Beebe.
